

TSAVKISI PARK

ABOUT THE PROJECT

A new premium-class residence complex built on 12000 sq. m. Distanced from urban noise, it's a cozy, closed neighborhood fits to modern people's needs.

Our main goal is to create an environment for residents where a house is more than a residence. Innovative development and a harmonious and ecological environment are essential at all stages of construction.

The project is being built in the completed "Tsavkisi Valley" area, which means there is already organized infrastructure and a green environment.

Tsavkisi Park is not just another settlement. This is a place that is adapted to modern urbanization requirements and creates an ideal environment for life.

A photograph of a modern courtyard. In the foreground, there is a round, dark-colored table with four matching chairs. The ground is paved with large, light-colored hexagonal stones interspersed with green grass. In the background, a long, low white structure with a dark base contains a fire pit with a fire burning. The walls are covered in lush green ivy. The overall atmosphere is serene and modern.

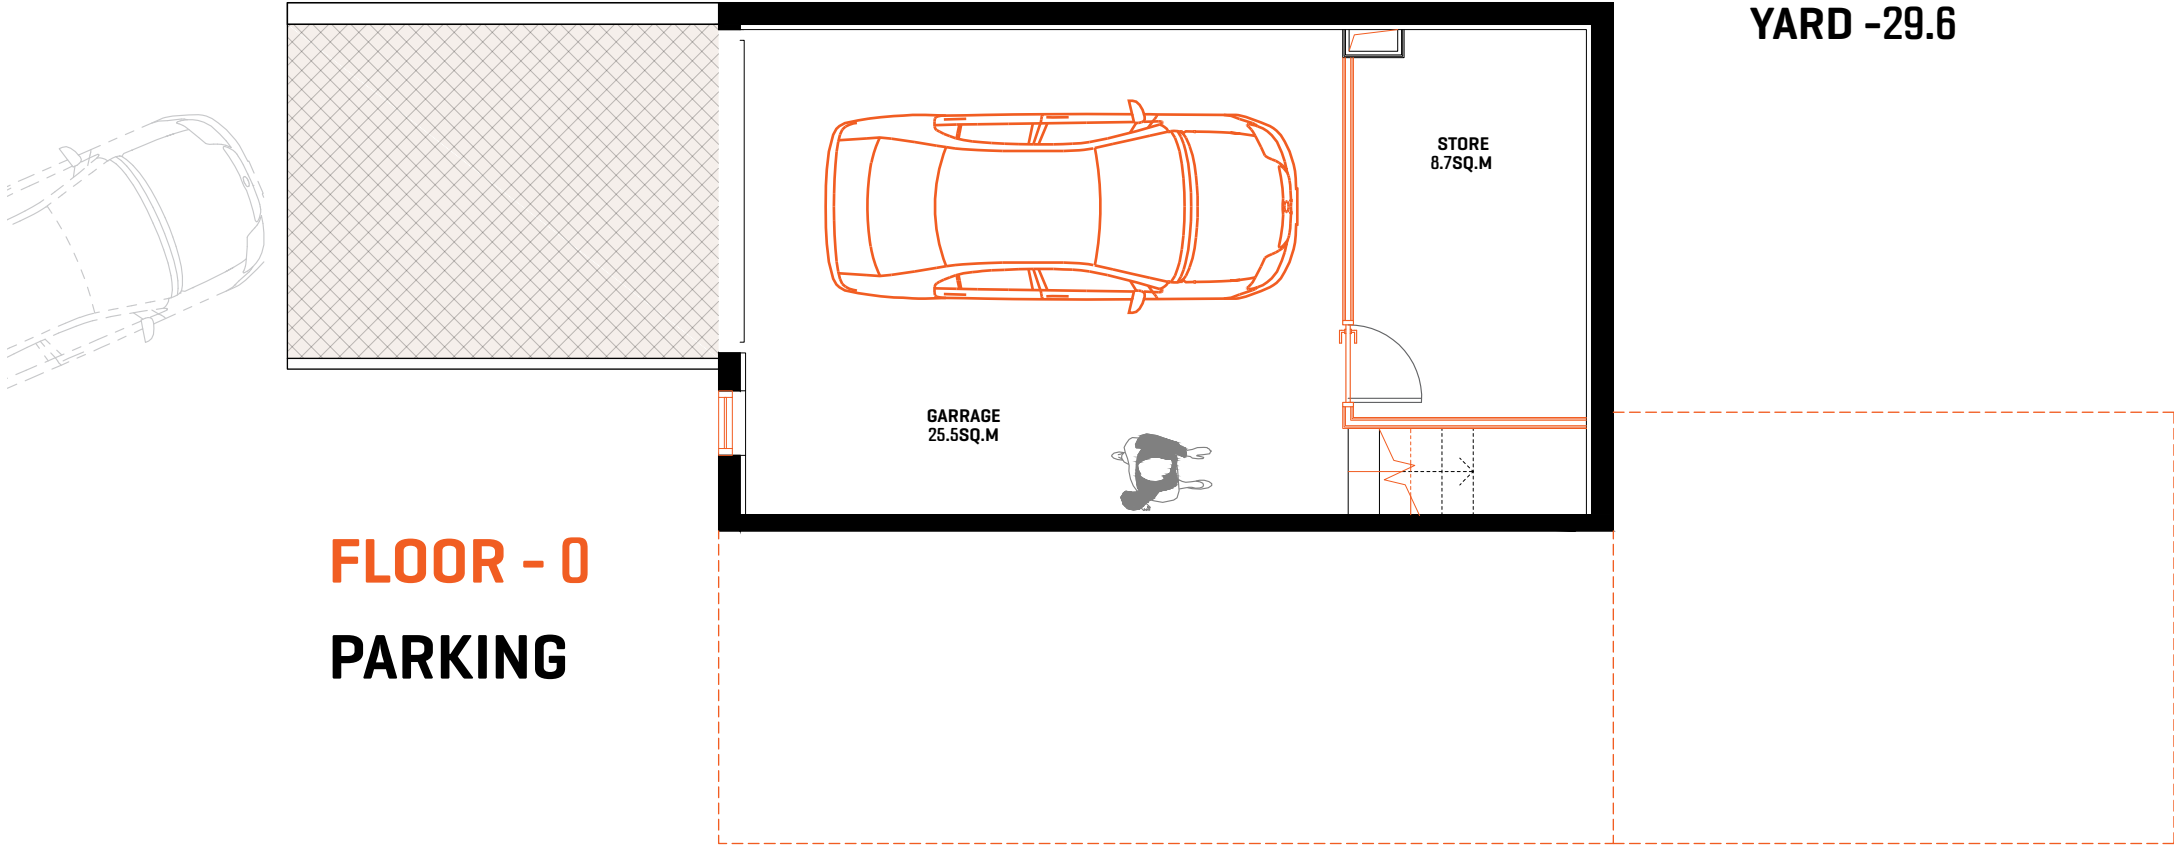

THE CONCEPT

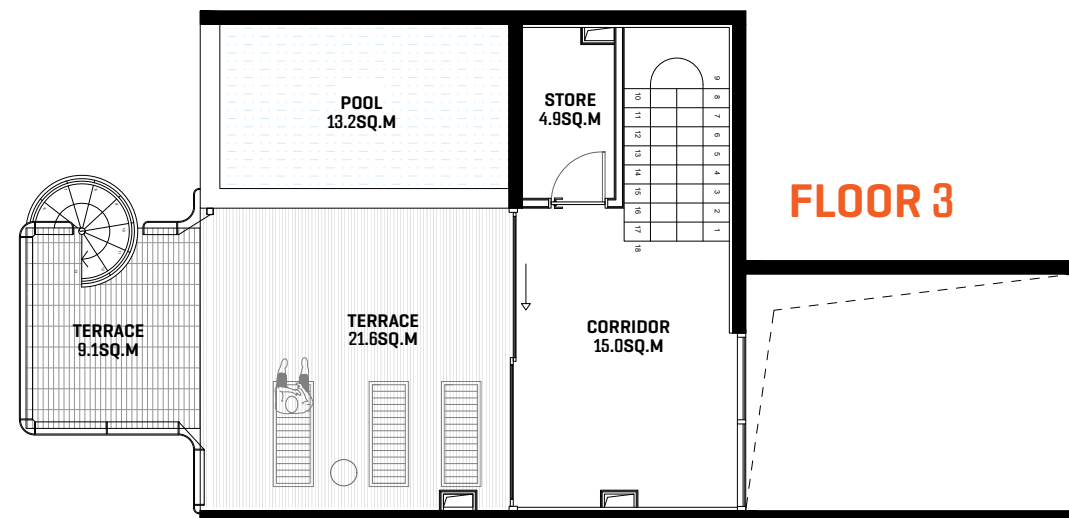

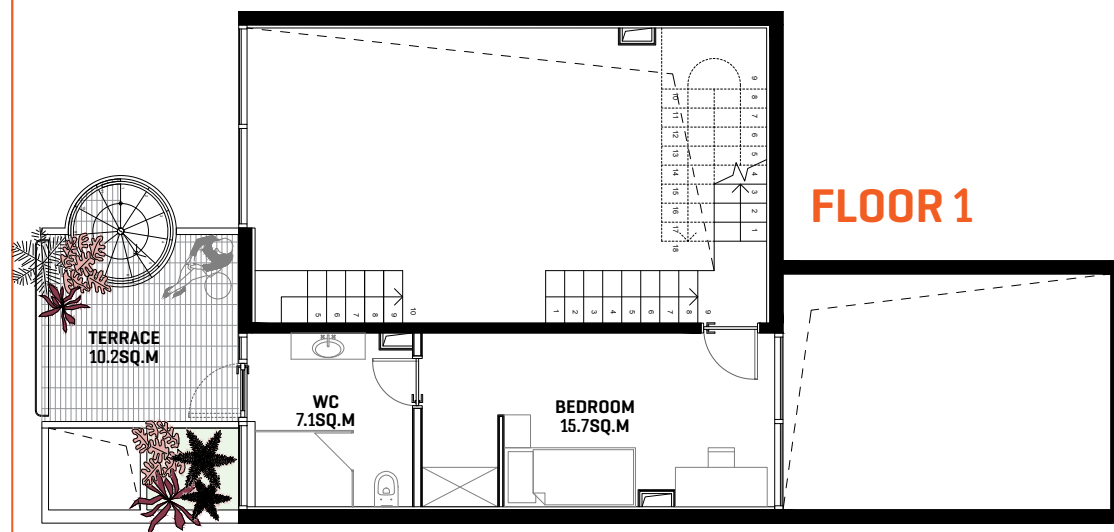

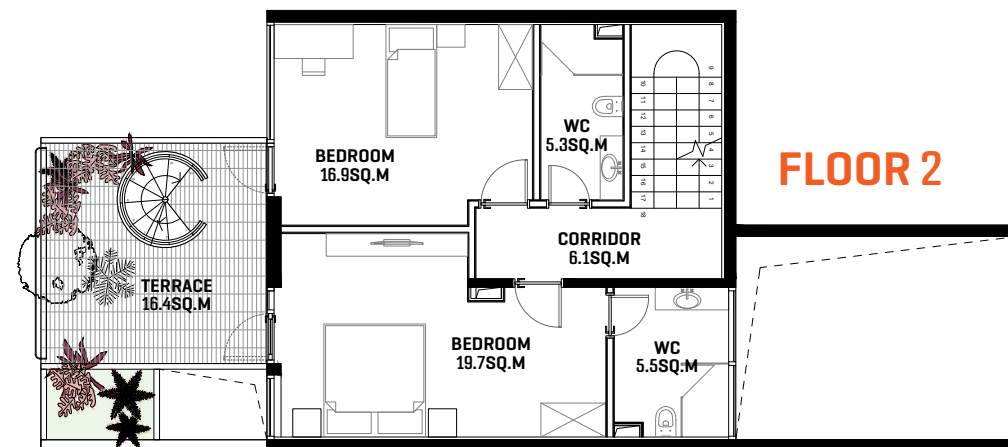

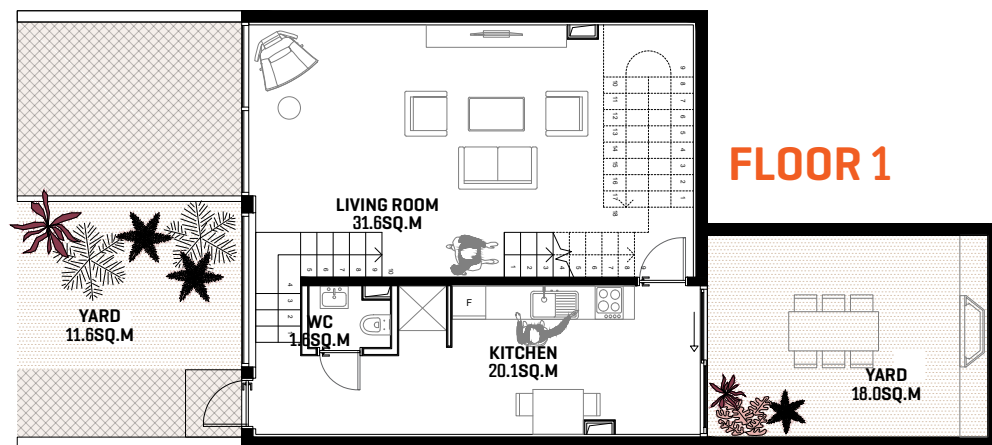

When planning the area, our team's main desire was to create an essentially healthy project that would have a positive impact on the quality of the residents' lives. Therefore, while working on the development plan, the primary goal was to preserve the recreational space, integrate with nature, and create a harmonious living environment.
